DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32 and 65-76, drawn to an accelerated graphics processing subsystem comprises a plurality of video cards, wherein modified graphics command streams is equal to the number of the plurality of video cards, classified in class 345, subclass 505.
- II. Claims 33-64, drawn to a method for accelerating the processing of graphics instructions on a computer through use of a plurality of video cards, wherein modified graphics command streams to a different video cards selected from the plurality of video cards, classified in class 715, subclass 500.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as drawn to an accelerated graphics processing subsystem, wherein modified graphics command streams is equal to the number of the plurality of video cards, instead of the modified graphics command streams to a different video cards selected from the plurality of video cards. In other words, each one of the inventions recited in groups I and II is separately usable in a system not having the other. See MPEP § 806.05(d).

Art Unit: 2676

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
